

# PROTECT YOUR ROOF

When it comes to keeping your business dry,

## IT'S AS EASY AS IT SEAMS!

### The "Proven Performer®"

Since 1978, billions of square feet of Duro-Last® membrane have been installed throughout North America. Through our best-in-class warranties, Quality Assurance processes, prefabricated systems and commitment to provide solutions, we work hard to stand by every square foot.

### The Power of PVC

Duro-Last PVC roofing membranes are waterproof, durable, serviceable, flame resistant, highly flexible and recyclable.

### Industry-Leading Warranties

Duro-Last warranties provide unparalleled protection for virtually all commercial roofing applications. We are the only manufacturer to offer warranties that expressly cover consequential damages.

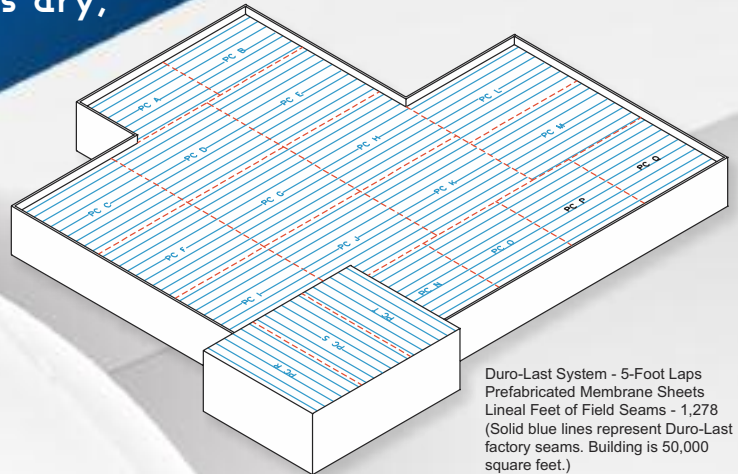

## Duro-Last Roofing Systems: Many Membrane Solutions

### The Core Duro-Last System

The Duro-Last membrane is a proprietary thermoplastic formulation that provides exceptional flexibility, reflectivity, resistance to UV radiation and flame retardance. Duro-Last adds no "filler" material to increase the membrane thickness; our film is the same proven formula from top to bottom.

Other membranes from Duro-Last include:

- Duro-Tuff®
- Duro-Fleece®
- Duro-Fleece Plus®
- KEE-Containing Duro-Last® EV

Duro-Last System - 5-Foot Laps  
Prefabricated Membrane Sheets  
Linear Feet of Field Seams - 1,278  
(Solid blue lines represent Duro-Last  
factory seams. Building is 50,000  
square feet.)

### Prefabrication from Duro-Last: Fewer Seams = Fewer Leaks

When you install a Duro-Last precision fabricated roof, up to 85% of the seams are completed in our factory-controlled environment before the roofing system is delivered to the job site. By eliminating most of the on-site seaming, you virtually eliminate the potential for leaks – and add the advantages of a faster, quieter installation, less maintenance and reliable roof performance for years to come.

Call us today to learn more about how to keep  
your business dry and your doors open.
