

THE DURO-LAST® ENERGY EFFICIENT ROOFING SYSTEM GET COOL TODAY. SAVE TOMORROW.

KEEP YOUR BILLS LOW...

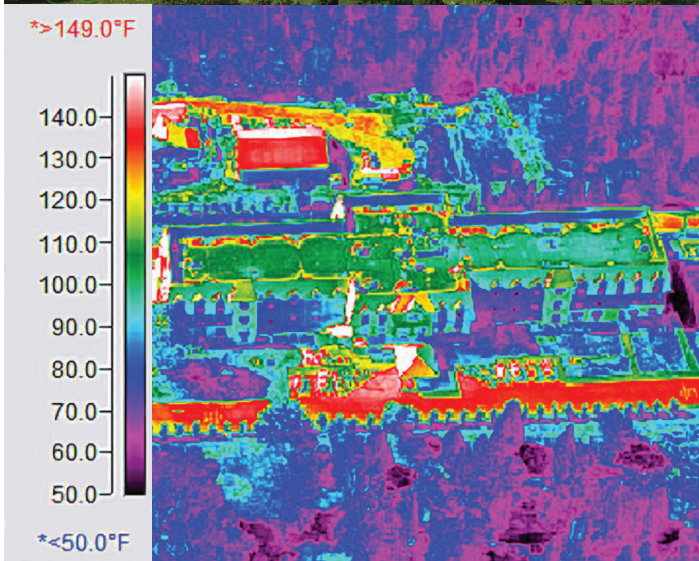

HIGH REFLECTIVITY, LOW ENERGY BILLS

By reflecting up to 88% of the sun's energy, the white Duro-Last Membrane can greatly reduce energy costs, making Duro-Last the ideal cool roof option. With a total solar emittance of up to 87%, the ENERGY STAR® qualified Duro-Last Membrane also releases energy and heat efficiently.

THE CUSTOM-FABRICATION ADVANTAGE

Duro-Last manufactures custom-fabricated roofing systems, where up to 85% of the seams can be completed in our factory-controlled environment. This eliminates most of the on-site fabrication that can lead to roof leaks - resulting in a long-lasting, reliable roof.

HOW TO STAY COOL...

SUN-PROOF AND LEAK-PROOF

Duro-Last Roofing Systems stay flexible and watertight – even after years of exposure to harsh conditions. This means that it resists the negative effects of prolonged ultraviolet exposure and helps reduce heat stress on rooftop equipment.

ENERGY SAVINGS THROUGHOUT NORTH AMERICA

These energy savings are not just for warm climates. A recent analysis suggests that the peak demand and net energy savings offered by cool roofs are available for both new and existing air conditioned buildings in all climates within North America.

ENERGY-EFFICIENT ROOFING THAT CAN SAVE YOU MONEY
